

## BIODEGRADABLE WASTE

The biodegradable/rest of waste bin has a adapted slot designed to reduce bad smell for home and industrial rubbish bags.

### To be used for

Food waste  
Waste which cannot be recycled  
Waste which cannot be classified

### Not to be used for

Waste to be disposed of in the separate recycling bins  
Dangerous goods (batteries, medicines)

## PAPER - CARDBOARD

The paper bin has an adapted slot. If the paper and cardboard waste to be disposed of is bigger, it shall be broken into smaller pieces for its correct disposal.

### To be used for

Newspapers, books, magazines  
Cardboard packs or boxes  
All kind of clean paper and cardboard

### Not to be used for

Foil paper  
Tetra Pak containers  
Nappies  
Dirty oily or greasy papers

## CONTAINERS

The packaging bin has a adapted slot. You can group your packaging waste in bags for a more comfortable disposal.

### To be used for

Plastic bottles and containers and Tetra Pak containers  
Tins and cans (preserve tins, sprays, etc.)  
Foil paper and packets

### Not to be used for

Cardboard or glass waste  
Polluting product containers (lubricants) CDs, videotapes, electronic devices

# Glass

The glass bin has a slot which is adapted for bottles. A specific key to open the front of the bin may be requested by those users with large amounts of glass waste.

## To be used for

Glass bottles (without caps)  
Glass jars

## Not to be used for

Light bulbs or fluorescent tubes  
Window panes, glasses, or goblets  
China or ceramic pieces

# Bin Islands

The townhall of Benissa has bet on a waste disposal service which is sustainable throughout time, where we can have disposal areas consisting of bin islands for the disposal of all different waste types

Disposing of our home waste in the right bins is a duty of all citizens, as it is the only way to maintain an environmental friendly and, as a result, economically sustainable waste disposal system.

# MULTIPLE BINS

Each colour, a waste type!  
As simple as that!  
It just depends on you!
